The diagram illustrates the timing of a CAN frame transmission on a 3-wire bus. The signals are CAN-H (red), CAN-L (green), and CAN-SS (blue). The frame structure is as follows:

- Start of Frame (SOF):** CAN-H is low, CAN-L is high, and CAN-SS is low.
- Recessive Period:** All signals are high.
- Data Byte G1:** CAN-H is low, CAN-L is high, and CAN-SS is low.
- Recessive Period:** All signals are high.
- Data Byte G2:** CAN-H is low, CAN-L is high, and CAN-SS is low.
- Recessive Period:** All signals are high.
- Data Byte G3:** CAN-H is low, CAN-L is high, and CAN-SS is low.
- Recessive Period:** All signals are high.
- End of Frame:** All signals are high.
